SUBJECT **DEU Brigade in Lithuania;**
Re: infrastructure Nemenčinė

Berlin, 20th July 2026

The Nemenčinė property is currently being used by German forces.
The territory we use consists of four land parcels and is further divided (cut through) by a public road.
According to the latest information about the road that leads through the property in Nemenčinė, it is open to the public and is used by civil traffic.
According to which aspects the passage takes place remains uncertain, even after several inquiries.
A Lithuanian security company is responsible for the external security of the property, but nonetheless, German forces are responsible for the internal security, who have to take into consideration a high security classification by German regulations and standards.

After passing the guard, these civilian vehicles move visibly, but not forcibly guided, through the property. It is quite conceivable that this circumstance can used in order to conduct espionage or sabotage of German forces and installations.

We note that in order to ensure the integrity of the military territory's perimeter and the protection of deployed military units, for the proper deployment and combat readiness of allied military units, the contiguous area of approximately 7.6 hectares is required. The area designated exclusively for military purposes (administered by the national defense system), where military infrastructure (and other engineering structures) would be used solely to meet the military requirements.

The requirement to block the road for civil transit traffic is considered to be appropriate and logical for the purpose of mitigating the risk.
Due to German military security, counter intelligence and force protection requirements, Germany requests to refuse the use of this road for civil transport as had been agreed upon already in the past.

For the Federal Ministry of Defence
